Editor's note

HEPEX daily mission is to gather newspaper
sources about flood, drought and forecasting topic
around the world. Inside the HEPEX daily, we used
sources from Africa, South and North Americas,
Asia, Europe and Oceania.

HEPEX is a community initiative with many people
contributing and working on specific topics. Please
visit the [blog posts](#) to find out more.

HEPEX seeks to advance the science and
practice of hydrology ensemble prediction (HEPS)
and its usage for risk-based decision making by
engaging in several kinds of ongoing

HEPEX can do so through participation in
the HEPEX activities.
